

PROJECT MANAGEMENT

Providing Effective Solutions and Professional Services

CEG - PMP Group

Is a multi-disciplinary staffing and technical consulting division of Capital Energy Group, LLC offering long and short term augmented staffing solutions in the commercial nuclear, federal, power, and industrial construction industries.

Providing Professional Talent

CEG - PMP CONNECTS YOUR BUSINESS TO THE PROFESSIONAL SERVICES YOU NEED

CEG - PMP specializes in providing staffing solutions for industrial, construction and power (nuclear, fossil, hydro) industry issues, outage and non-outage support for long term and short term assignments. Our approach to staff augmentation integrates an understanding of our client's needs and aligning those needs with the expertise of our technical professionals.

Flexible Solutions for Your Business Needs

CUSTOMIZED STAFFING SOLUTIONS

CEG - PMP provides a total augmented staffing solution. Our recruiting team provides services beyond sending out resumes. CEG - PMP's candidate evaluation and selection process is an extensive one. Candidates are fully screened based on their work history, experience, education, training and knowledge of specific job-related tasks.

Our talent management systems allow us to 'remember' each client's unique need – enabling us to deliver talented professionals well-versed in that client's expectations.

"The Inland Empire Energy Center, a GE 7H 800mw power facility will be one of the most advanced combined-cycle power plants in North America," said Eagle Johnson, GE facility manager at the site. "Operating on natural gas, this highly efficient plant will provide cleaner power for the people of California while also helping to increase the state's energy security and CEG's PMP Group has been a big part of making this project successful for GE and the State of California."

PROJECT MANAGEMENT & SPECIALTY SERVICES

CEG - PMP recognizes the complexities involved in staffing large industrial construction, nuclear and specialty utility projects. Our Project Staffing Method promotes consistent practices in the evaluation and placement of associates and assures alignment with project-specific goals and objectives. The employee staffing process is designed to integrate our client's need and the project scope in the evaluation of candidates.

STAFFING METHOD

CEG - PMP is not just another staffing company that gathers resumes, but effectively evaluates prospective hires – enhancing our ability to find the right candidate for our clients. In addition, our system tracks company-wide talent utilization allowing us to (1) plan for future opportunities and (2) seamlessly transition our workforce to various projects.

Review Client Needs – We conduct a detailed review of client and project needs before implementing a staffing strategy.

Develop Organizational Chart – We gain an understanding of the project organizational structure to assure the placement of the best talent.

Create Project Staffing Plan – We develop a project-specific staffing plan to address specific needs and milestones on each project.

Conduct Candidate Assessment and Placement – We implement our staffing process to review, evaluate and place qualified talent.

Conduct Project Orientation – We equip talent resources with the project requirements and goals to better support the client's needs.

Conduct Performance Surveys – We conduct performance surveys to reveal strengths, development opportunities or positional misfits.

Ongoing Staffing Support – We provide continued staffing support throughout the project lifecycle and make adjustments as needs evolve.

EXPERIENCED MANAGEMENT

While having a professional staffing team is of utmost importance, CEG - PMP recognizes that all levels within the organization have a great impact on our ability to recruit and retain a qualified workforce. As such, our management team supports our staffing efforts by recommending talent and by providing routine updates on the availability and performance of current employees.

Monitoring our internal talent resources benefits our clients by greatly reducing the time required to onboard associates and by placing an associate who has demonstrated expertise in their field.

CEG - PMP understands that each project presents its own set of unique challenges. Therefore, project specific requirements and challenges are communicated to our candidates upfront. By assuring a shared understanding of the role and expectations, the new hire's effectiveness and performance is enhanced from day one.

- Proven Project Staffing Method
- Extensive Talent Management System
- Strong Relationships with Industry-leading SME's
- Structured Candidate Evaluation System
- Established Performance Evaluation Process

We have a deep respect for the work of our customers and understand the importance of our role in delivering the highest quality professionals to the job every single time. Each one of our consultants is fully screened and tested.

About Us

Capital Energy Group, LLC is a demolition and environmental management company that was founded in 2006 and later renamed in 2019 by Thomas McNamara. Over the last 13 years the company has performed some of the highest profile D&D projects within the DOE Legacy Waste Complex and the Commercial Nuclear Industry.

In 2008 we expanded our services and diversified markets to meet a myriad of needs from our clients and formed CEG's Project Management Professionals Group (PMP), which provides staff and craft augmentation, and our Construction Services Group, which self performs domestic and international construction services.

As discussed within this brochure, our CEG Project Management Professionals Group, is a technical consultation, augmented staffing and management services organization providing a broad range of professional services to private, public, and government sector clients throughout the United States, Canada, UK, UAE and Saudi Arabia.

"On behalf of Williams, I wish to extend my appreciation to the Project Staff and Executive Management of CEG's PMP Group who have contributed to the success of the Yokogawa Recorder Control Room Project and the Emergent Outage I&C Containment Project at FPL's St. Lucie Nuclear Power Facility"
